ZOOLOGY

(Honours Core)

Paper : ZOO-HC-4036

(Biochemistry of Metabolic Processes)

Full Marks : 60

Time : Three hours

***The figures in the margin indicate
full marks for the questions.***

1. Answer the following questions : $1 \times 7 = 7$

- (a) What are aquaporins ?
- (b) Which shuttle mechanism is used in the cells of skeletal muscle and brain ?
- (c) ATP is a coenzyme/isozyme/apoenzyme.
(Choose the correct option)
- (d) The major site of gluconeogenesis is _____.
(Fill in the blank)

Contd.

- (e) Palmitic acid is straight chain saturated fatty acid. *(True/False)*
- (f) Give an example of glucogenic amino acid.
- (g) The inner mitochondrial membrane is impermeable to H^+ ions/ OH^+ ions / K^+ ions. *(Choose the correct option)*

2. Answer the following questions briefly :
2×4=8

- (a) Differentiate between anabolism and catabolism.
- (b) Define substrate level phosphorylation with example.
- (c) Write the significance of urea cycle.
- (d) Why is acetyl-CoA called as a key metabolite precursor ?

3. Answer the following questions : *(any three)*
5×3=15

- (a) What is shuttle system ? Describe the malate aspartate shuttle system.
- (b) Give an account of ketogenesis and its regulation.

- (c) Write elaborately about inhibitors of electron transport system.
- (d) Describe briefly the pathways of formation of glycogen.
- (e) "ATP is the energy currency of the cell." Justify the statement.

4. (a) Describe elaborately the process of glycolysis. Add a note on its regulation.
8+2=10

Or

- (b) Describe the pentose phosphate pathway of carbohydrate metabolism. Mention its significance. 8+2=10

5. (a) Give an account of various steps of Krebs cycle. Why this cycle is called an amphibolic pathway ? 8+2=10

Or

- (b) What are various complexes of Electron Transport System (ETS) ? Describe the flow of electron through the complexes with illustration. 4+6=10

6. (a) Describe the process of β -oxidation of saturated fatty acid with even number of carbon atoms along with its energetics. $8+2=10$

Or

- (b) What is transamination ? Describe the mechanism and significance of transamination. How does it differ from deamination ? $1+6+2+1=10$
