3 (Sem-6/CBCS) BOT HE 2

## 2023

## BOTANY

(Honours Elective)

Paper: BOT-HE-6026

(Analytical Techniques in Plant Sciences)

Full Marks: 60

Time: Three hours

The figures in the margin indicate full marks for the questions.

- 1. Answer the following questions very briefly: 1×7=7
  - (a) What do you mean by arrayed data?
  - (b) Name the scientist who first created the scanning electron microscope.
  - (c) Paper chromatography is an example of liquid-liquid/liquid-solid chromatography.

(Choose the correct option)

- Succinate dehydrogenate is the enzyme (d) marker for which cell organelle?
- In X-ray crystallography, is used (e) to position the crystal in desired orientation. (Fill in the blank)
- What are the limitations of chromosome painting?
- Silver (Ag) atom is used for image (g) formation in \_\_\_\_\_\_.(Fill in the blank)
- Give very short answers of the following questions:  $2 \times 4 = 8$ 
  - (a) Do all chromosomes have same banding pattern? Give reasons.
  - Mention two precautions that need to be taken during preparation of chromatographic plates in TLC.
  - What is X-ray crystallography? (c)
  - Application of Spectrophotometry in biological research.
- Write short notes on any three of the 3. 5×3=15 following:
  - (a) PAGE

- (b) Freeze fracture technique of electron microscopy
- Autoradiography
- Differentiate between differential and density gradient centrifugation.
- Write answer of the following questions: 10×3=30
  - (a) What do you mean by column chromatography? What is the working principle of column chromatography? Describe the procedure of this kind of chromatography and the precautions to be taken while doing this technique. 1+2+5+2=10

Or

Write short notes on the following: 5×2=10

- Application of flow cytometry (i)
- Ion exchange chromatography
- Write the definition of the following along with their merits and demerits:  $5 \times 2 = 10$ 
  - Median
  - Mode (ii)

Write the definition and formula for calculation of standard deviation. What is the significance of standard deviation in biological studies? Write the merits and demerits of standard deviation.

2+2+2+2+2=10

(c) What are the types of Gel Electrophoresis? Describe different steps involved in Agarose Gel Electrophoresis process for extraction of DNA from plant material. Mention the factors affecting electrophoresis.

1+6+3=10

## Or

What is Cryofixation? Describe different types of cryofixations used in biological studies. How cryofixation is necessary for biological studies?

2+6+2=10
